INSECTICIDES

ABA-19

Abamectin 1.9% EC

It is a highly effective insecticide and acaricide. It acts in contact and stomach poison action. It gives long-duration protection. Furthermore, it is used to control yellow mites, red mites, red spiders, two-spotted mites, etc.

ALPHA-10

Alphamethrin 10% EC

A contact insecticide which controls cotton Bollworm, Leaf roller, Stem borer, Fruit borer in cotton, rice, groundnut, bhindi, brinjal, soybean, cabbage, cauliflower, sugarcane, mango, etc.

STAR-10

Bifenthrin 10% EC

Bifenthrin is used on various agricultural crops and in homes.

Carbo-3G

Carbofuran 3% CG

It is a systemic insecticide used for the control of Maize, Sugarcane, Rice stem borers. It kills the pest by its contact & stomach mode of actions.

FIESTA 4G

Cartap Hydrochloride 4% GR

is used to Control of chewing & sucking insect pests of many crops including paddy, Vegetables. Systemic and contact in action. Highly effective at low concentration and can control almost all stages of insects

Chloro 20 CS

Chlorpyrifos 20% CS

It is used to control and prevent termites in both commercial and residential setup. It can be commonly used on paddy, cotton, wheat, maize, potatoes, sugarcane, vegetables & fruits.

Stopper - 505

Chlorpyrifos 50%EC + Cypermethrin 5%

It is used to control over all sucking, biting, chewing pests and also use to control vegetable insects and plant insects like cotton bollworm.

CORA-18

Chlorantraniliprole 18.5% w/w SC

Chlorantraniliprole is a human-made insecticide. It is in a class of pesticides called anthranilic diamides. It controls moth and butterfly caterpillars (larvae). It also controls some beetles and "true" bugs like aphids and spittlebugs.

Ema-5

Emamectin Benzoate 5% SG

It is used for the control of bollworms on cotton, fruit and shoot borer on okra, Diamond back moth on cabbage, fruit borer, thrips and mites on dog out and shoot borer on brinjal, pod borer in red gram and chickpea, thrips of grapes.

FIPRO-5

Fipronil 5% SC

It is a modern insecticide of the Phenylpyrazole group which controls the insect pests of rice, chilli, cabbage/cauliflower and sugarcane effectively. It has been proven to offer low dose, highly effective insect control against a broad range of economically important pests.

Fipro G

Fipronil 0.3% GR

It acts as an insecticide with contact and stomach action. It disrupts the insect's central nervous system by blocking the passage of chloride ions through the GABA receptor, an inhibitor of the central nervous system.

IMIDA-178

Imidacloprid 17.8% SL

It is a systemic insecticide of the Neonicotinoid group which controls the sucking insects and termites very effectively. It is an antagonist by binding to postsynaptic nicotinic receptors in the insect central nervous system.

Imida Gold

Imidacloprid 30.5 % SC

It is a systemic insecticide. It can be used as a spray for the control of sucking and other insects – Thrips, Aphids, Jassids, Brown plant hopper, White backed plant hopper etc in different crops like Cotton, Paddy, Sugarcane, Mango, Groundnut, Grapes, Chillies, Tomato etc.

LAMBDA-5

Lambda cyhalothrin 5% EC

A pyrethroid insecticide that acts by contact and stomach action. The product controls sucking and lepidopteron pests in various crops. Crop: Brinjal, Chick pea, Chilli, Cotton, Groundnut, Mango, Okra, Onion, Paddy, Pigeon pea, Tomato.

Lamda-49

Lambda cyhalothrin 4.9% CS

A pyrethroid insecticide that acts by contact and stomach action. The product controls sucking and lepidopteron pests in various crops. Crop: Brinjal, Chick pea, Chilli, Cotton, Groundnut, Mango, Okra, Onion, Paddy, Pigeon pea, Tomato.

PRO-404

Profenofos 40% + cypermethrin 4%

It is a combination product of organophosphorus and pyrethroid compound. It is used to control bollworm of cotton. It depends on the occurrence of the insect pests.

Thilam-129

Thiamethoxam 12.6%w/w + lambda-cyhalothrin 9.5%w/w zc
It is an insecticide recommended for the control of aphids, jassids, thrips & bollworms in cotton.

THIO-25

Thiamethoxam 25% Wg is a granular soluble insecticide of Neonicotinoid group. It gives protection against insects for a longer period in comparison to other insecticides. THIO-25 is safe to the environment in comparison to other insecticides because of its lesser dose per acre.

THIO 30

(Thiamethoxam 30% FS)
It provides control of a wide range of early season sucking and chewing, leaf-feeding and soil-dwelling insect pests, such as aphids, wireworms, flea beetles, and leaf miners.

HERBICIDES

AGNI

2, 4-D Amine Salt 58% SL
Used on a wide variety of terrestrial and aquatic broadleaf weeds. It has little effect on grasses.

GLYPHO-41

Glyphosate 41% SL It is a systemic herbicide, kills the weeds by inhibiting the EPSPS synthesis in weed plant. Being a non-selective herbicide, it effectively kills all types of weeds. It is widely used in non-crop areas, open fields, bunds and water channels. It is also used in tea crop to control various weeds.

Glypho 71

Glyphosate 71% SG
It is used as post emergence herbicide for the control of annual, perennial, broad leaf and grassy weeds. When applied to foliage reaches the roots and rhizomes of the plant by the process of translocation, thereby destroying the weeds from below the ground.

SAPHAAYA

Paraquat Dicloride 24% SL
It is an important tool for the control of weeds in many agricultural and non-agricultural settings.

PRETILA-37

Pretilachlor 37% EW
It is a pre-emergence herbicide (Containing Pretilachlor) for control of grasses, sedges and some broad leaf weeds in transplanted Rice. FIRE provides excellent selectivity on all known varieties of Rice.

FUNGICIDES

AZOXY 23

Azoxystrobin 23% SC is a broad spectrum systemic fungicide recommended for the control of downy and powdery mildew diseases infecting Grapes, fruit rot and powdery mildew of chilli, anthracnose and powdery mildew of mango, early and late blight of tomato and late blight of Potato.

AZOXY - T

Azoxystrobin 11% + Tebuconazole 18.3% w/w SC is a suspensible concentrate fungicide effective for control of fruit rot, die back and powdery mildew in Chilli.

AZOXY D

Azoxystrobin 18.2 % w/w + Difenconazole 11.4 % w/w SC It's a dual systemic broad-spectrum fungicide with protective and curative action. It offers not only disease control but also improves crop health, quality and yield of a crop

HEXA-5

Hexaconazole 5% SC It is highly systemic fungicide having protective and curative action. It is useful for controlling Powdery mildews, Rusts and Leaf spots in cereals, Oil seeds, horticultural and plantation crops and also for the effective control of Rice Sheath blight.

RODENTICIDE

Sulfo-80

Sulphur 80% WDG It is broad spectrum contact and protective fungicide & miticide. It also provides. Sulphur which is essential plant nutrient. Insect/Disease Spectrum powdery mildew, scab, leaf spots and all types of mites.

RAT SHOOT

**Zinc phosphide 80% ww
Packing 500 gms**

Zinc Phosphide is used as rodenticide. It is eaten up by animal such as rats, mice, rabbit and ground squirrels, causing stomach acid which releases toxic gas phosphine and affects the target cells in the heart, lungs and liver.

BORON LIQUID

Boron Liquid

It is both preventive and curative solution to control the insufficiency and deficiency of boron in the crops

CALCIUM LIQUID

Calcium Liquid

It plays an extremely important role in development of plant tissues and enable plants to grow better

POTASH LIQUID

Potash is necessary for the growth and development of plants. potash helps in protecting the crops from the weather adversity, such as drought, moisture, and insects. potash is the most important element to increase the quality of crops

SULPHUR LIQUID

Sultan keeps the plant healthy and vigorous and thus increases the yield and quality of produce.

ZINC LIQUID

Liquid ZINC helps in quick uptake and correction of zinc deficiency and effect lasts for long term.

PGR

BATMAN

Promotes Flowering and reduces flower drop. Improves fruit quality (size, shape, weight, colour, shine etc...) Increase plant resistance to extreme temperatures, high humidity.

Bheem Putar

It provides macro nutrients like **nitrogen, potassium, phosphorus and micro nutrients like zinc, copper and boron** in easily absorbable form. It helps in sustaining the soil ecology. It helps in improving soil structure.

Comfort

Bio Stimulant N.P.K. – 19:19:19
The nutrients for vegetative growth in stems, roots particularly during the early stages, root growth, seed and flower formation, bud growth and ripening of fruits.

Comfort

Bio Stimulant N.P.K. – 20:20:20
The nutrients for vegetative growth in stems, roots particularly during the early stages, root growth, seed and flower formation, bud growth and ripening of fruits.

Director

Humic acid is a group of molecules that bind to, and help plant roots receive, water and nutrients. High humic acid levels can dramatically increase yields. Humic acid deficiency can prevent farmers and gardeners from growing crops with optimum nutrition

Gibb Gold

Gibberellic Acid 0.001% L.
It Increase size of plant, stimulate flower, enlarge fruit and boost crop yields. It also Increase soil microbial activity and higher nutrient uptake.

Humestar plus

Humic acid liquid is a group of molecules that bind to, and help plant roots receive, water and nutrients. High humic acid levels can dramatically increase yields. Humic acid deficiency can prevent farmers and gardeners from growing crops with optimum nutrition.

NITRO-35 GRANULES

NITROBENZENE 35% V / V
It is a research based product containing nitrobenzene 35%V/V with naturally available vegetable protein.It is a plant energizer, Flowering stimulantsand yield booster. It enhances the plant canopy and induces profused flowering and thereby increases the yield.

RED FLOWER-35

NITROBENZENE 35% V / V
It is a research based product containing nitrobenzene 35%V/V with naturally available vegetable protein.It is a plant energizer, Flowering stimulantsand yield booster. It enhances the plant canopy and induces profused flowering and thereby increases the yield.

Shaktiman Calcium

It provides macro nutrients like **nitrogen, potassium, phosphorus and micro nutrients like zinc, copper and boron** in easily absorbable form. It helps in sustaining the soil ecology. It helps in improving soil structure.

Super Poshak

It is a yield enhancer that helps plants grow faster. helps in flowering and fruiting. Improves yield and increases yield. it emphasizes on more number of branches, more flowers, more production and improvement in shelf light.

SILICON GLO

Silicon Sticker is used in agriculture as adjuvant as well as tank mix for foliar spray as well as soil application.

Corporate Office

JAY BHARAT ORGANICS

(An ISO 9001:2015 Certified Company)
